The New Benchmark In Productivity And Security

Savin 4051/4060/4075

SAVIN

Savin 4051/4060/4075 Series – The

Meet the SAVIN® 4051/4060/4075 Series – quite simply the most advanced multifunctional systems we've ever introduced. Featuring high-performance digital technology, intelligent connectivity choices, expert document production capabilities, and state-of-the-art document security functionality, the 4051/4060/4075 Series is ideal for corporate workgroups, centralized copy and reprographic centers, and Print-for-Pay facilities. And, whether you're working with electronic documents from the desktop or with hardcopy while standing in front of the system, you'll have access to all of the 4051/4060/4075 Series' powerful document production, management, and distribution capabilities.

Just One Gets The Job Done

With the Savin 4051/4060/4075 Series, you get everything you need in a single system…

- **High-Volume Digital Copier**
- **On Demand Production Printer**
- **Versatile and Productive Network Scanner**

Plus, each device ships standard with powerful device and document management utilities, which allow IT staff and end-users to monitor and manage the 4051/4060/4075 Series from the desktop or at the system itself.

Make Every Workday More Productive

With the Savin 4051/4060/4075 Series, you'll get through more work – with greater efficiency than you ever thought possible…

Fast…

At speeds of 51, 60 and 75 PPM, the 4051/4060/4075 Series speeds you through even the busiest production days. Plus, with true 1200 dpi resolution, your documents always present a professional image.

Flexible…

Regardless of what you ask of it, the 4051/4060/4075 Series is always up to the task, thanks to a variety of capabilities that automate the document production process and reduce user-intervention:

- **Highly productive One-Pass Duplex Scanner with 100-sheet capacity and Job Build capability**
- **8,300 sheet total paper capacity**
- **Scan Once, Print Many**
- **Covers, Tabs, Chapters, Collating, Page Numbering, Stamping, Stapling and Punching**

Final Word On Office Productivity.

Finished…

Choose from a variety of finishing options to produce professionally finished documents at the touch of a button – or click of the mouse.

Saddle Stitch Finisher – allows users to create perfectly finished newsletters, mailers, booklets, manuals, and more.

100-Sheet Multi-Position Stapling Finisher – ideal for finishing larger document sets.

50-Sheet Multi-Position Stapling Finisher – perfect for finishing everyday business documents.

9-Bin Addressable Mailbox – enables users to direct printed output to a specified location, keeping jobs separate in a busy workgroup environment. This option is available with the Saddle-Stitch or 50-Sheet Finisher.

Z-Folding Unit – helps customers finish more documents in-house, reducing the time and cost of outsourcing (available with Saddle-Stitch Finisher).

Additionally, all three Finisher options offer a 3,000-sheet capacity and a user-selectable two and three hole punch option, which eliminates the need to purchase expensive pre-drilled paper.

Security In An Insecure World

Intellectual property is the lifeblood of successful businesses, and with more and more of it residing in cyberspace, you need a solution that will protect those valuable assets. The Savin 4051/4060/4075 Series incorporates advanced security capabilities designed to give you complete peace of mind – particularly when the system resides on your network.

Windows Authentication – Prevents unauthorized usage of the system as users must input their "User Name/ Password" – the same one used to login to their PC, eliminating the need to remember an additional password – prior to using the system. Upon successful login, the 4051/4060/4075 Series' Scan-

to-e-mail capability is activated and the authenticated user name is sent to the "Sender's Name" field.
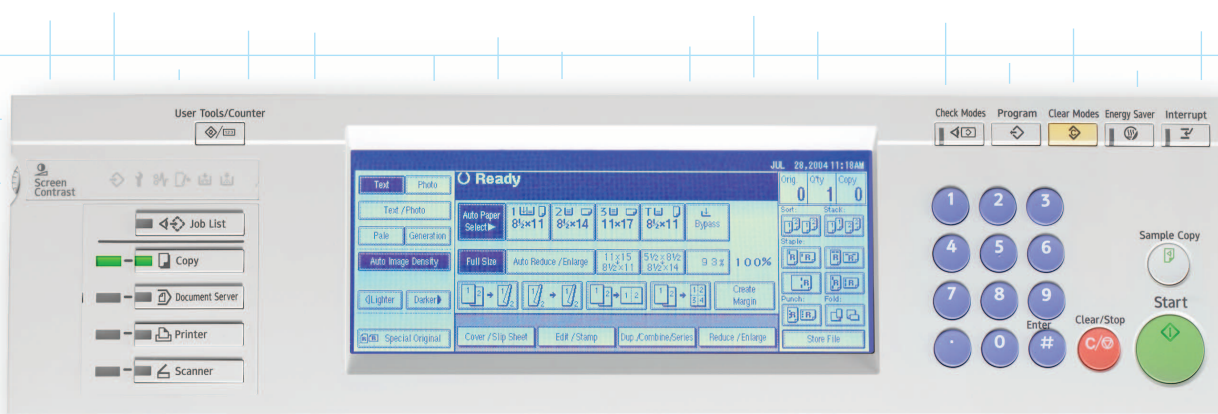

**DataOverwriteSecurity System (DOSS)** – Provides automatic overwriting of temporary data on the hard drive after each copy, scan or print job. The data is overwritten a minimum of three times, which significantly reduces the possibility of information theft or unauthorized retrieval, and conforms to National Security Agency (NSA) recommendations for managing classified information.

Removable Hard Drive (RHD) – Easily manage classified and/or sensitive information with the Removable Hard Drive option. With this option, the Savin 4051/4060/4075 Series' internal hard drive is mounted externally in a secure bay, from which it can be unlocked, removed, and stored in a secure location after processing classified information. For added security, you can purchase an additional hard drive, which enables you to keep classified and unclassified information completely separate.

Intuitive Control Panel

The large, user-friendly Touch Panel Display ensures easy access to all of the Savin 4051, 4060 and 4075's functions.

LDAP support from the Control Panel lets you plug into your company's global e-mail address book.

Intelligent Document Distribution Solution

Combining the power of the Savin 4051/4060/4075 Series, your LAN, and the Internet means that you can quickly digitize information and then send it where it needs to be – across the country or around the globe – virtually instantaneously.

Capture…

Quickly scan existing hardcopy using the 4051/4060/4075 Series' One-Pass Duplex Scanner and/or Platen Glass.

Send…

With just a few keystrokes, scanned documents are swiftly dispatched to multiple e-mail addresses, network folders, and/or desktop management applications, like Savin's DeskTopBinder. Plus, users can enter destination addresses directly from the 4051/4060/4075 Series' Touch Panel Display (Ad-hoc) or search for destinations in the corporate address book using Lightweight Directory Access Protocol (LDAP).

Store…

Savin's Document Server Technology intelligently manages hardcopy and electronic files, while also providing an advanced Print-on-Demand solution.

You Can…

Store documents – digital files and scanned hardcopy – in the Document Server, print them when you need them, and eliminate re-transmission or re-scanning of originals.

Combine electronic files and scanned hardcopy to create completely new documents.

Assign a private PIN code to documents going to the Document Server and ensure document confidentiality.
View documents in the Document Server, combine multiple stored documents into a new file, and apply finishing selections from the workstation using Savin's DeskTopBinder software or a standard Web browser.

Insert pre-printed sheets as covers and slipsheets with the post-process Interposer.

Run multiple paper stocks – including tabs and covers – from the internal paper trays.

Multiple finishing options provide the capability to create professional, finished documents in-house.
